PROFESSIONAL SUMMARY

As a full-stack developer, I build sleek, high-performance web applications using Django, React, and Flask. I have hands-on experience developing dynamic e-commerce platforms, secure API integrations, and user-friendly dashboards with a focus on speed, scalability, and exceptional user experience. My strength lies in problem-solving—whether it's optimizing complex SQL queries, enhancing back-end performance, or designing intuitive front-end interfaces. Passionate about writing clean, maintainable code and driving innovation, I transform ideas into powerful, scalable web solutions that deliver real-world impact.

EDUCATION

Python Full Stack Web Development

Synnefo Solutions Ernakulam, Kerala

July 2024 - Jan 2025

Bachelor of Computer Application (BCA)

IHRD Nadapuram, Kozhikode, Kerala

Aug 2021 - May 2024

PROJECTS

Flipkart

This project is a web application built with Django, designed to replicate the core features of the Flipkart e-commerce platform. The application allows users to browse products, add them to their cart, and make purchases. It also includes features such as product search, filtering by categories, user registration and login, order tracking, and payment integration.

GAME HAVEN

GAME HAVEN is a platform for discovering and sharing torrent files, allowing users to access a wide range of games like shooting racing, etc. It provides magnet links and peer-to-peer file sharing using the BitTorrent protocol. GAME HAVEN makes it easy to find and download torrents while relying on decentralized seeding for efficient file distribution.

Gallery Wallet

Gallery Wallet is a personal storage space where users can securely store and manage their photos, videos, audio files, and other media. It allows easy access to uploaded files, with options to organize and mark favorites for quick retrieval. With a user-friendly interface, Gallery Wallet makes it simple to keep all your important media in one place.
